US Superstore Sales & Profitability Dashboard (2014–2017)

Executive Summary & Business Storyboard

1. Overall Revenue & Seasonal Growth

- Generated **$2.30M in Total Sales** and **$286.40K in Total Profit** across **5,009 orders** (an overall profit margin of **12.47%**).
- Revenue consistently peaks every **Q4 (Sept–Dec)** due to holiday and year-end corporate buying, with 2017 reaching an all-time high.

2. The Core Problem: Profit Bleed from Heavy Discounting

- While **Technology** (Copiers, Phones) delivers the highest profit margins, the **Furniture** category suffers from severe margin erosion.
- **Tables (-$17.7K)**, **Bookcases (-$3.5K)**, and **Supplies (-$1.2K)** lose money despite generating strong top-line revenue.
- **Root Cause:** Aggressive promotional discounting—averaging **26% on Tables**, **31% on Machines**, and **37% on Binders**—directly wipes out unit profitability.

3. Regional & Customer Segment Performance

- **West ($108.4K profit)** and **East ($91.5K profit)** lead the company, while **Central ($39.7K profit)** lags due to high regional discounting.
- The **Consumer segment** drives over half of all sales (**$1.16M / 50.56%**), followed by **Corporate (30.74%)** and **Home Office (18.70%)**.

4. Strategic Business Recommendations

- **Cap Discounts at 15%–20%:** Enforce a strict discount ceiling on **Tables, Bookcases, and Machines** to immediately recover **$20K+ in annual profit**.
- **Optimize Q4 Campaigns:** Shift Q4 marketing toward high-margin **Technology** (Copiers, Phones, Accessories) and bundle low-margin Furniture with profitable Office Supplies.
